Dear Sir or Ma'am:

A recent query for job openings at Monster.com alerted me to your search for a Web Programmer that will test, develop, maintain, and support software systems. My experience as a software developer for over 10 years, along with the skills I'm learning while pursuing a Bachelor's Degree in Information Technology, make me an excellent addition to your team.

My passion for computer software stems from my need to innovate and improve existing systems. Throughout my career as an Information Systems Operator-Analyst in the U.S. Army, I sought ways to automate processes by creating new software to meet a variety of needs. Currently, I continue to create and maintain independent web programs of my own. These applications use the latest technologies and provide me with an environment to continually build my skills. I look forward to the opportunity to work with others to create innovative solutions that are effective, creative and professionally polished.

Please review the enclosed résumé for additional information regarding my reliability, experience, and skills. I look forward to talking with you about how my education and experience can benefit your company and its customers in the future.
